Greg,

Thanks for the update which is wonderful news. Are you going to ship #601 & #617 for cleaning this week also? I am aware that either the EPA or TCEQ's contractor removed the sand from the Wayland gate prior to your activities. I have discussed the Gate's sand blockage issue with Nicole Bealle this morning, since you will be in and out of the site several times this week it does not represent a problem. Hopefully, D. Askanase will receive approval from the TCEQ to proceed with the removal of the stock piled waste this week.

Mickey,

Update, the haz box will be shipped on Wednesday and processed within a week. We moved the shipment of the non-haz box to Thursday to accommodate the haz shipment.

We did not move any sand at the Wayland gate, there wasn't any blocking the gate. I won't have any equipment there to do that.

Thanks Greg,

Will you have a way to place the sand that was removed from the Wayland Gate when you pickup the box on Wednesday?

Yes, got them both transferred. I have the non-haz box scheduled for pickup on Wednesday. As of right now, the hazardous box can't be processed by Clean Harbors until October. We are on the standby list in case someone cancels. I have requested that we be allowed to ship the box to get it off the CES site as soon as possible.

I plan to invoice for the work done and the disposal of the non-haz box as soon as it is shipped. The disposal of the haz box will have to wait until it is processed and weight is verified. Do you agree with all of that?

Did you see the coverage on the news last night? The fire department was at the site on Saturday afternoon and the news said they took water samples and were having them analyzed. Apparently the agencies and city departments aren't communicating with each other. Surprise, surprise.....
